## INSTRUCTIONS for **ABSTRACT** preparation

1. Please use at this point in time directly the PAPER **template** "EFCF-2020\_SOFC\_Paper\_Template\_Xyyzz\_Short-title\_Family-name\_Given-name\_NewDates-Version.docx" to prepare your Abstract (see [www.EFCF.com/Download](http://www.EFCF.com/Download)).
2. **Edit** the example texts, being sure to keep the format unchanged from the example.
  - Rename the template file with Abstract file name according to the following scheme: "Short-title\_Family-name\_Given-name\_Current-Version.docx" (e.g. PEFC-MembraneConductivity\_Smith\_John\_01.docx). The number "\_01" for first submitted version, "\_02" for the second if applicable, etc.
  - Overwrite all sample text with your content, but keep the formats as given in this template. Make a copy for you to go on with the extended abstract later after the acceptance\*\* (point 4.).
  - Clear all **Yellow Highlighted Letters** and **Red Comments** and unused parts in the template.
3. After filling in your contact information as an author on [www.EFCF.com/AC](http://www.EFCF.com/AC) (Author Centre) or [www.EFCF.com/Upload](http://www.EFCF.com/Upload), login and **up-load** your one-page Abstract immediately to catch-up the possibility to be listed in the program.
  - Insert your contribution title and choose your Abstract docx file.
  - Just in case an oral place will be suddenly dispoible, indicate your preference: Oral or Poster.
  - Mandatorily suggest the 3 most relevant topics for your Abstract. If only one topic applies, enter this topic 3x.
  - Add Co-Authors, who have to be listed in the Publications of the EFCF Conference.
  - Submit file and information - You will get a confirmation mail. This can last some minutes.  
- AND receive notification about acceptance ca. 5-8 workdays later.
4. Acceptance obligates you to submit a full length manuscript as fast as possible, which is a mandatory condition to be listed as either an oral or poster contribution in the final program and in the proceedings.
  - \*\*You can use then your copy of the file and go on.
  - Get the "Instructions for PAPER Preparation" on [www.EFCF.com/Download](http://www.EFCF.com/Download).

For Frequently Asked Questions please visit [www.EFCF.com/FAQ](http://www.EFCF.com/FAQ) or email [DTU@efcf.com](mailto:DTU@efcf.com).

**Upload the ABSTRACT as soon as possible,  
to not miss the chance to be listed  
in the final program and the proceedings.**

Abstract

EFCF\_Text

are key components of solid oxide fuel cells. High porosity is essential for the fuel gas in the outer region of the anode structure. Near the electrolyte, however, the charge exchange is of importance. The two electrons released by each arriving oxygen ion have to be conducted by the Nickel in the Cermet material to the bipolar plate. After passing through the same, they become available at the cathode of the next cell for the ionization of other oxygen atoms. On the anode the charge exchange occurs along triple phase boundaries, i.e. along lines formed by the ion conducting electrolyte, the electron conducting porous anode and gaseous fuel molecules filling the voids.
