Hydrogen Economy in Europe

Wednesday, May 07, 2025

TIME

10:30 am - 12:00 pm

HALL

Messe München

ROOM

Hall B2, Booth B2.550

After the hype the deception, at least with respect to exaggerated expectations. Against this, we start to see various instruments deploying effects and projects getting built. What effects do the Hydrogen Bank auctions, IPCEI, the Innovation Fund and Valley projects deploy? What questions do research and innovation still need to address? This session provides an overview of the EU level progress and challenges on the path to energy security and decarbonisation.
